

The ideal solution for Fast, Efficient and Safe Loading/Unloading Operations

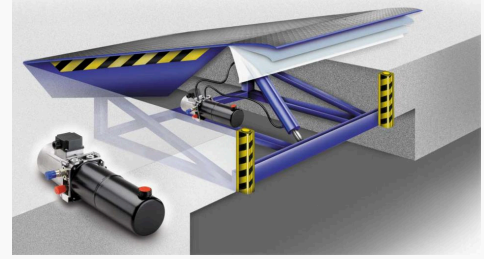

RSA

iCat® Dock Leveler

iCat® RSA Model Yükleme rampaları bina ile araç arasındaki farkların ortadan kaldırarak daha hızlı, güvenli ve ekonomik yükleme/boşaltma yapılmasını sağlar.

- Made of strong profile
- Ability to use by stopping at various angles
- Anti-slip steel is used
- Eliminates height difference and ensures efficiency

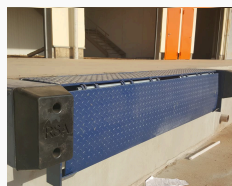

Low Labor, High Efficiency

iCat® loading ramps reduce the need for human power in the transportation of heavy loads. It saves time for companies by speeding up loading and unloading processes.

No Losing Space For Loading

The loading ramp makes it possible to move the actual loading and unloading area outside the building and thus save the corresponding floor space inside.

One Product, Multiple Benefits

With the iCat® Dockleveler, work accidents are prevented, material damage is reduced, work processes are optimized and operating costs are reduced.
