

**Space saving, thermal insulation and durability
all gather in a single door.**

RSA

iCat® Rolling Steel Doors

Easy to operate and maintain, these shutters can be controlled manually or by various activation methods and their simple design allows for effortless cleaning and maintenance, making them a cost-effective solution.

- Aesthetic appearance, high resistance
- Can be applied in customized size
- Integration into all kinds of automation and safety systems
- Sound and heat insulation
- Fast on/off feature

High Security and Space Saving

In addition to providing high security against theft and unauthorized entry, they do not take up space on the sides and in the ceiling area as they roll upwards when opened.

Thermal And Sound Insulation

iCat® Rolling Steel Doors offer energy savings by contributing to sound and thermal insulation, especially in industrial areas.

Made of Durable Materials

Made of durable and long-lasting materials, they are the perfect solution for high-traffic areas.
