iCat® Loading Shelter

Food Production Facility

Cold Storage

DIY Store

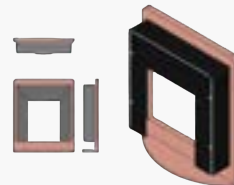

Warehouse/Storehouse

Exhibition Center

iCat® Loading Shelter is the most convenient and easiest way to install around industrial doors and provides a safe loading and unloading environment as well as ease of use, leaving the appropriate passage clearance for the plants.

- Provides safe approach between building and vehicle
- By acting as a gasket, it prevents heat loss and external conditions from affecting the inside.
- By closing the gap between the vehicle and the building, it prevents external factors such as air, dust and moisture from entering.
- Provides energy saving.

Possibility of Damage-Free Operation Even in Faulty Maneuvers

The bellows are specially designed not to be damaged even by faulty maneuvers of trucks or lorries.

One Product Multiple Benefits

Reduces energy consumption in places such as cold storage. Preserves the freshness and quality of products. Long lasting: It has a long life as it is made of durable materials.

Healthy and Efficient Working Environment

iCat® Loading Shelter helps to protect the health of personnel by preventing sudden changes in weather, thus increasing operational efficiency along with a healthier working environment.
