

iCat® Hermetic Door (Hinged)

iCat® Hermetic Hinged Door is specially designed for use where there are physically narrow passages combined with hygiene and sealing.

Pharmaceutical Industry

Healthcare Sector

Food Packaging

Research Laboratory

Veterinary Clinic

Clean Room

- Reliable, aesthetic, hygienic and comfortable.
- Designed for intensive use.
- Wide range of accessories.
- Different window types are possible in the door leaf according to customer preference.

Seamless Stretcher Passage

Within the door passage distance, there is no guide on the floor to prevent stretcher passage and brushes are not used under the doors.

Minimum Pressure Passage

iCat specially designed Hermetic hinged doors, with stainless steel full frame and adjustable hinges, provide a low-pressure passage between two rooms with different pressures with a gasket surrounding the door leaf.

Seamless Design

We produce the frame with non-twisted HPL hygienic leaf or stainless leaf surface and the frame is both face to face and there is no indentation and protrusion. The panel has a monolithic panel feature.
