

# Elegant and Rational Solution with Different Leaf Combinations for Limited Spaces...

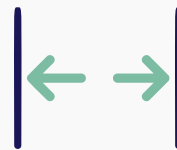

**RSA**

## iCat® Telescopic Automatic Door

iCat® A110 T2-T4 model Telescopic photocell door leaf offers a solution to every architectural environment thanks to its dimensions. Thanks to its different leaf options, it perfectly adapts to passage points, including restricted spaces.

- High performance iCat encoder motor and German Dunker DC encoder motor options are available.
- Simple RSA design and easy installation advantage
- No need for blind frame application
- Equipped with self-cleaning rail system.

### Maximum Passage Area

Stores, shopping malls, supermarkets, restaurants, hotels, cafes, pharmacies, hospitals, laboratories, nursing and care homes, public buildings, museums, universities, airports and train stations... Briefly, regardless of the project, it offers the widest possible passage area, including restricted places.

### Create Your Own Door

The RSA iCat telescopic door is available in a range of leaf, glass, control unit and accessories to meet all your requirements.

### Patented Profile System

RSA iCat Telescopic Automatic Doors use a patented profile system. The profile system has been subjected to 3,000,000+ opening/closing tests in our factory.
